**MULTEK WINS DANAHER TEST AND MEASUREMENT'S 2009 OUTSTANDING
SUPPLIER PARTNERSHIP AWARD**

Shenzhen, China, September 2, 2009--Multek, a wholly-owned subsidiary of Flextronics (NASDAQ: FLEX), today announced that it has been recognized by Danaher Test and Measurement as its 2009 outstanding supplier of the year. Multek was chosen based on criteria including quality, delivery performance, engineering support and cost for its work with two of Danaher Test and Measurement's business units, Tektronix and Fluke. Multek supplies printed circuit boards for Tektronix and Fluke products as well as LCD displays for Fluke products.

"Multek has consistently provided superior value and technical support for the Test and Measurement business," said Jeff Jones, director of Tektronix commodity management. "Their technical innovation, quality culture and flexible business solutions are a role model of supplier excellence."

"We are very pleased with this recognition and would like to thank the team at Danaher for honoring us with this award," said Werner Widmann, chief executive officer and president of Multek. "The team at Multek is completely committed to providing the highest quality, most reliable PCB manufacturing solutions to customers worldwide. This recognition underscores our dedication to serving Danaher, as well as our other customers, and to providing leading edge products that improve the competitiveness of our customers."

Multek was honored with the award at Danaher's 2009 annual supplier symposium, which took place in Everett, Washington last month.

About Multek

Multek, a wholly-owned subsidiary of Flextronics, is a leading manufacturer of PCB and display technologies. Ranked as one of the world's top ten PCB suppliers, Multek offers a broad spectrum of engineering and manufacturing expertise including rigid and flexible circuits, assembly, specialty materials as well as display and touch solutions. Multek's commitment to rapid response, attention to detail and to delivering high technology solutions for fabrication, electronics design and manufacturing enables customers to take products to market quickly through advanced technology production and a full range of high performance materials. Multek offers solutions from a global network of facilities in the Americas, Europe, and Asia. To view additional company information, please visit www.multek.com.
